

3 looks for...

WARM, SNUG SPACES

Escape from the chilly weather to a cosy home with Emma Fishman's three wonderfully welcoming schemes

GOOD IDEA

Faux foliage is an easy-care alternative to fresh flowers

GOOD IDEA

Don't have an open fire? Create a focal point with a collection of pillar candles on a sturdy surface

1 Grand designs

Smarten up your living space with botanical green shades punctuated with black and metallic accents for a sophisticated, yet ultra glamorous feel

Stack old suitcases for an alternative side table that provides extra storage, too

Fill spare surfaces with homely trinkets and accessories to complete the scheme

A leaning ladder bookcase provides display storage without being too bulky

Don't be afraid of a darker palette. The leafy green wall shade acts as the perfect backdrop for deep-coloured furniture and shimmering metallic accessories.

Give worn leather armchairs a lift with green velvet and check cushions to complement the room perfectly, and add a bundle of chunky throws to keep it feeling extra cuddly. The black ladder bookcase gives an industrial dimension, and makes the metallic copper accessories pop that little bit more. Weave through a dewy, botanical feel with faux leafy stems that'll last a lifetime and won't require any watering at all. A generous cowhide rug completes the look, whilst also keeping it incredibly cosy underfoot, too.

'Scour charity shops, eBay and auction rooms for second-hand suitcases and other rustic items to finish the look'
